Professional Profile

Data Science student at ESCOM (IPN) and Programming Technician with a solid foundation in Python, SQL, Java, backend development, and relational database design. Passionate about artificial intelligence, cloud technologies, and data-driven solutions, with hands-on experience developing academic software projects. Currently strengthening skills in Power BI, data visualization, applied data science, and AWS Cloud while working toward a career as a Machine Learning Engineer.

Technical Skills

Data and Automation: SQL, Relational Database Design, Python (currently learning for Data Analysis with Pandas), Microsoft Excel (currently learning), Power BI (currently learning)

Programming Languages: Python, SQL, Java, C++, JavaScript

Software Development: Object-Oriented Programming (OOP), Backend Development, REST API Development & Integration, Algorithms, Data Structures, Debugging, Clean Code, Modular Development, Version Control (Git)

AI & Tools: OpenAI API Integration, AI-Assisted Automation, Git, GitHub, VPS Deployment, AWS Cloud (currently preparing for AWS Cloud Practitioner)

Education

Bachelor's Degree in Data Science

Escuela Superior de Cómputo (ESCOM) – Instituto Politécnico Nacional *Currently studying*
(Expected graduation: August 2029)

Programming Technician

Centro de Estudios Científicos y Tecnológicos No. 9 “Juan de Dios Bátiz” – IPN

Relevant Experience & Projects

CastorWay – Educational Management Platform

Developing a full-stack educational management platform using Java, Spring Boot, SQL, and relational databases. Contributing to backend development, business logic implementation, database design, and scalable application architecture following software engineering best practices.

SAFIA – Educational Innovation Management Platform

Contributed to the development of an educational management platform by designing the database, implementing Python/SQL backend components, deploying services on a VPS, and automating document validation workflows to reduce manual processes.

Infrastructure & Cloud Architecture Integration | Academic Research Project

Researched cloud computing infrastructure efficiency and resource mapping. Currently expanding this expertise by actively preparing for the AWS Cloud Practitioner certification within the IPN AWS Club.

Hackathon Participation – Mobility & AI: “Your Future Made in Austria”

Collaborated in a multidisciplinary team to design and present an AI-based mobility solution under strict time constraints, strengthening teamwork, rapid prototyping, and problem-solving skills.

Languages

Spanish: Native

English: B2 (currently studying at CENLEX IPN). Comfortable with technical documentation and conversational communication

German: A1 (Basic). Currently learning.
